The following terms and conditions apply to the glass breakage and seal failure warranties:

1. **Who is Covered:** This limited warranty coverage is offered only to the owner of the property at the time of the film's installation.
2. **What CLC will do:** CLC will pay for repairs or replacement up to \$500 (U.S.) per glazing unit.

4. **No Warranty or Pre-Existing Conditions:** Pre-existing conditions of glass breakage, thermal shock fracture or seal failure of the filmed glazing unit voids this warranty coverage.
5. **Documentation:** In order to qualify for seal failure coverage, the owner must present documentation from the window manufacturer that a seal warranty is currently in force. This warranty for seal failure will not extend beyond the term of the window manufacturer's limited warranty.
6. **Definitions:** "Seal Failure" means a visible break or opening of the window's air seal, resulting in an ineffective sealing of the window, allowing moisture and/or air to penetrate, and causing an internal fogging of the glass. "Thermal shock fracture" means a cracking or fracture of the glass caused by heat or change in temperature resulting from the application of film to glass, and identified by the following characteristics: (a) break lines make up a right angle with the edge of glass at or near the origin, and (b) break lines separate into two (2) or more lines within two (2) inches of the edge and the origin. The extra heat stress from the installation of the film must be the primary reason for the break or failure.
